

1 The Business Model is a conceptual framework that describes how a venture creates, delivers and captures value. Start by describing a Customer Segment and identifying their needs.

2 The Value Proposition is the collection of products and services that your venture will provide to satisfy those needs. A good value proposition is aligned with the strengths of your team.

The remaining components are there to help you create and deliver the Value Proposition to each Customer Segment. Start designing your venture by answering the questions in each box.
